

OPD-A0332

FEATURES

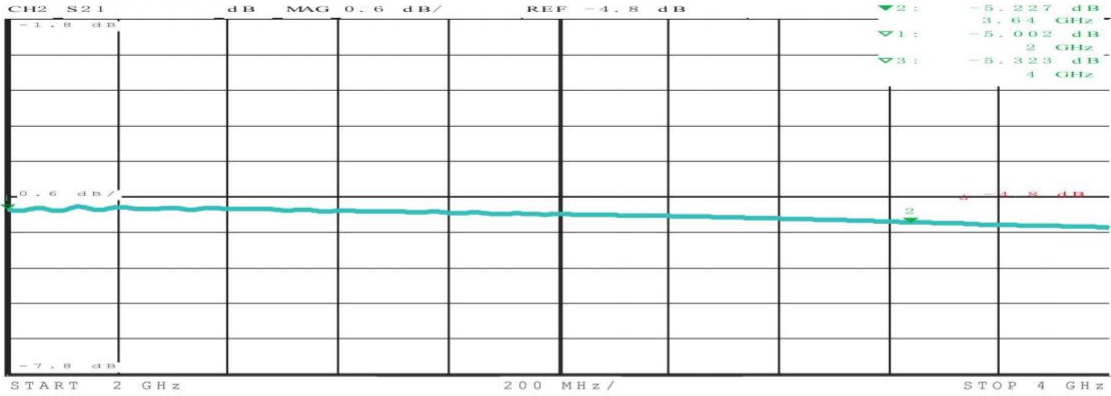

- SMA connector 0° power divider
- Series frequency coverage: 0.5-18GHz
- Small size, low loss, low VSWR, high isolation
- High batch production consistency
- Applications: Electronic countermeasures, radar, navigation, test and measurement, communication systems
- Function: 3-way microwave signal distribution and synthesis
- Standardized product, customizable designs available

DESCRIPTION

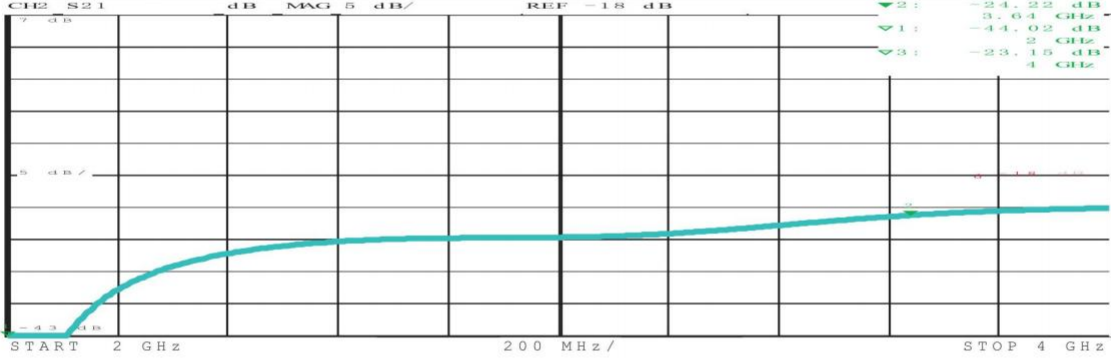

The A-series power dividers are SMA connector 0° power dividers, covering the full 0.5-18GHz range. Features include small volume, low loss, low VSWR, and high isolation. This series uses batch production control methods, resulting in high product consistency capable of meeting large-volume supply requirements. The OPD-A0332 is primarily used in electronic countermeasures, radar, navigation, test and measurement, and communication systems for the distribution and synthesis of 3-way microwave signals. This series is a standardized product of Tiger; custom designs are available based on user needs.
